

JOHN SMITH

Cloud and DevOps Engineer | 8 Years Experience | john.smith@email.com  
(999) 555-1234 | Seattle, WA

## SUMMARY

Highly accomplished DevOps professional with 8 years of experience specializing in building, securing, and automating scalable infrastructure on leading cloud platforms. Proven ability to implement CI/CD best practices and manage containerized applications.

## TECHNICAL SKILLS

### AWS

Terraform, Ansible, Jenkins, Docker, Kubernetes.  
Python (Advanced), Bash Scripting.  
Databases: PostgreSQL, MongoDB (Atlas).  
Monitoring: Grafana, Prometheus.

## WORK EXPERIENCE

### Senior DevOps Engineer, TechCorp (2018 – Present)

- \* Led the migration of on-premise infrastructure to a highly available AWS environment, reducing latency by 20%. This included comprehensive management of the cloud infrastructure using advanced networking tools.
- \* Managed all infrastructure resources using Terraform and maintained a 99.9% uptime SLA.
- \* Implemented a serverless architecture using AWS Lambda for event-driven processing.

### DevOps Engineer, Innovate Solutions (2016 – 2018)

- \* Maintained CI/CD pipelines using Jenkins.
- \* Assisted development teams with Docker container setup and deployment.
